

iSpeed Moevs first one & second one iSpeed Tenways CGO600 New edition

user manual

USER MANUAL (ALL INSTALL VERSIONS)

Legal note

The iSpeed blackbox is not to be used in normal road traffic or in areas regulated by the Road Traffic Act! Use is only permitted on private property. The use of the iSpeed blackbox is entirely at your own risk and responsibility. The manufacturer accepts no liability for loss of warranty, damage to property and/or persons arising from the use of the product.

iSpeed added functionality

1. On Moevs make sure the "PUSH" support mode is selected.
2. Press the "down" button for 3 seconds (walk assist) to toggle between "unlimited" and "25 km/h" mode. The setting is stored in the iSpeed blackbox even when the bike is turned off and confirmed with a light flash: 1x flash "25 km/h" and 2x flash "unlimited"
3. In "unlimited" mode the actual speed is 1.5x higher than the displayed speed. This is caused by the modification of the wheel size setting since on these bikes the max speed setting is locked in firmware.

Turn on the bike

Press "down" button 3s
